Allowable Subject Matter

The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and the applicant's arguments, the Examiner finds the claimed invention to be patentably distinct from the prior art of record.

As to the rejection under 35 U.S.C. 103(a) over Rodeheffer in view of Schmidt, the prior art of record teaches the invention substantially as claimed. However, the prior art fails to teach either alone or in combination a system and method for "preferentially routing exchanges over a port of the at least one port having such status value selected from the group of active and normal when a port having such status exists and a target node of the exchange is reachable over that port."

The examiner finds applicants arguments to be persuasive. The applicants argued in substance that the prior art "automatically activates the other link" as opposed to "preferentially routing" as claimed. See Remarks, pages 9 and 11. The specification pages 11 and 30-31 disclosing the "preferential" routing is also found to be persuasive in distinguishing the prior art over the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
